Anti-HBsAg [5C3] Bulk Size Ab00769-2.3-BT

This antibody was created using our proprietary Fc Silent™ engineered Fc domain containing key point mutations that abrogate binding to Fc gamma receptors.

Isotype and Format: Mouse IgG2a, [Fc Silent™](#), Kappa

Clone Number: 5C3

Alternative Name(s) of Target: HBV surface antigen; Major surface protein

UniProt Accession Number of Target Protein: Q773S4

Published Application(s): RIA

Published Species Reactivity: Hepatitis B Virus

Immunogen: This antibody was prepared by immunizing BALB/c mice with a highly purified preparation of HBsAg.

Specificity: This antibody is specific for hepatitis B virus surface antigen, a common antigen on the surface of HBV-infected hepatocytes and the outer coat of the intact virus. It recognizes all known subtypes of HBsAg, and has a very high affinity constant for its HBsAg determinant. This antibody does not cross-react with 2C6 and 5D3, two other anti-HBsAg Mabs, as each recognizes a distinct and separate determinant on HBsAg.

Application Notes: This antibody, when radio-labelled with iodine-125, has been used to develop highly sensitive solid-phase radioimmunoassays for the detection of HBsAg at subnanogram levels in human serum (Shafritz, 1982). Consequently, this antibody may be a useful reagent in the immunodiagnosis of hepatitis B infection.

Antibody First Published in: Wands et al. High affinity monoclonal antibodies to hepatitis B surface antigen (HBsAg) produced by somatic cell hybrids *Gastroenterology*. 1981 Feb;80(2):225-32. [PMID:6161061](#)

Note on publication: Describes the original generation of this antibody, along with a panel of other anti-HBsAg Mabs.

Product Form

Size: 1 mg Purified antibody in bulk size.

Purification: Protein A affinity purified

Supplied In: PBS only.

Storage Recommendation: Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer

storage, aliquot and store at -20°C.

Concentration: 1 mg /ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
