Anti-Glycophorin A M antigen [M2A1] Bulk Size Ab00789-1.1-BT

Isotype and Format: Mouse IgG1, Kappa

Clone Number: M2A1

Alternative Name(s) of Target: M sialoglycoprotein; PAS-2; CD235a

UniProt Accession Number of Target Protein: P02724

Published Application(s): immunoblot, inhibition assay, ELISA

Published Species Reactivity: Human

Immunogen: M2A1 was prepared by immunizing BALB/c mice with human red blood cells of the M phenotype, and was screened by testing for anti-M activity.

Specificity: M2A1 binds specifically to the M antigen on human erythrocytes, and shows no reactivity to N antigen. The epitope for this antibody includes the amino-terminal serine residue and sialic acid residues of glycophorin A. The reactivity of M2A1 for M antigen is pH- and salt-dependent (optimum ~ pH8-9). Blood group antigen M is located on the major sialoglycoprotein (glycophorin A) of red blood cells.

Application Notes: M2A1 can bind to M antigen of glycophorin A and can be used in ELISAs, immunoblots and modified M glycoprotein can be used for inhibition tests.

Antibody First Published in: Jaskiewicz et al. Characterization of the epitope recognized by a monoclonal antibody highly specific for blood group M antigen. Transfusion. 1990 Mar-Apr;30(3):230-5. [PMID:1690467](#)

Note on publication: Describes the generation and characterization of M2A1 antibody against M antigen.

Product Form

Size: 1 mg Purified antibody in bulk size.

Purification: Protein A affinity purified

Supplied In: PBS only.

Storage Recommendation: Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg /ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
