## Anti-Tau [MN423] Bulk Size Ab02389-10.0-BT

This chimeric human antibody was made using the variable domain sequences of the original mouse IgG2b format for improved compatibility with existing reagents, assays, and techniques.

**Isotype and Format:** Human IgG1, Kappa

**Clone Number:** MN423

**Alternative Name(s) of Target:** MAPT; TAU; PHF-tau; MAPTL; MTBT1; TAU; PHF; Tau proteins; Alzheimer paired helical filaments; Paired helical filament-tau; Microtubule-associated protein tau; Neurofibrillary tangle protein; mAb 423; NOAL 6.423; NOAL 6/66.423.2

**UniProt Accession Number of Target Protein:** P10636

**Published Application(s):** ICC, WB, ELISA, IF, IHC

**Published Species Reactivity:** Human

**Immunogen:** The original antibody was generated by hyper-immunizing C3H mice with tangle-enriched fragments of the Alzheimer paired helical filaments core.

**Specificity:** This antibody recognizes the pronase-resistant core PHF and the 12 kDa tau fragment but does not recognize normal full-length tau. It is also reported that this antibody specifically recognizes tau truncated at Glu391 on the C terminus side. The addition or removal of a single residue at the C-terminus abolishes immunoreactivity.

**Application Notes:** This antibody was characterized in detail (Novak et al., 1989; PMID: 2602435) and has been extensively utilized in Alzheimer's disease research: It played a crucial role in the structural characterization of the Alzheimer paired helical filament (PHF) core (Wischnik et al., 1988; PMID: 2455299), and was employed for extracting two peptide fragments (9.5 and 12 kDa) of the PFH pronase-resistant core through immunoblotting (Wischnik et al. 1988; PMID: 3132715). Additionally, it was used to study the folding of the Alzheimer's core PHF subunit through competitive ELISA and western blotting (Skrabana et al., 2004; PMID: 15196943). It has been instrumental in the molecular investigation of neurofibrillary degeneration in Alzheimer's disease (Bondareff et al., 1994; PMID: 7509849). Epitope mapping revealed that it requires a glycine at position -3 with respect to the C terminus (Khuebachova et al., 2002; PMID: 11983234). In the realm of tau protein studies related to Alzheimer's disease, it has been employed for immunohistochemistry on brain tissue samples (Mondragón-Rodríguez et al., 2014; PMID: 24033439). Double and triple-labeled immunofluorescence was conducted using this antibody on brain tissue from Alzheimer's disease patients (Mondragón-Rodríguez et al., 2014; PMID: 24033439) (García-Sierra et al., 2003; PMID: 12719624). This antibody was used to immunoblot purified candidate tau analogs (Novak et al., 1993; PMID: 7679073).

Furthermore, it was employed in immunohistochemical staining of brain tissue from patients with Alzheimer's disease, NCI, PSP, or CBD (Berry et al., 2004; PMID: 15475684). Western blot analysis on brain tissue from Alzheimer's patients was performed (Fitzpatrick et al., 2017; PMID: 28678775). This antibody was also used for a competitive ELISA on the Alzheimer's disease expression cDNA library made from the hippocampus of a 70-year-old patient who died from Alzheimer's disease (Khuebachova et al., 2002; PMID: 11983234).

**Antibody First Published in:** Wischik et al. Isolation of a fragment of tau derived from the core of the paired helical filament of Alzheimer disease. Proc Natl Acad Sci U S A. (1988); 85(12):4506-10.

[PMID:3132715](#)

**Note on publication:** The original publication describes the generation and use of this antibody for the extraction of two peptide fragments of Alzheimer paired helical filaments.

## Product Form

**Size:** 1 mg Purified antibody in bulk size.

**Purification:** Protein A affinity purified

**Supplied In:** PBS only.

**Storage Recommendation:** Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer storage, aliquot and store at -20°C.

**Concentration:** 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
