Anti-NORE1A [10F10-C6-C6] Standard Size Ab02692-10.0

This chimeric human antibody was made using the variable domain sequences of the original Mouse IgG1 format, for improved compatibility with existing reagents, assays and techniques.

Isotype and Format: Human IgG1, Kappa

Clone Number: 10F10-C6-C6

Alternative Name(s) of Target: Ras association domain-containing protein 5; New ras effector 1; Regulator for cell adhesion and polarization enriched in lymphoid tissues; RAPL

UniProt Accession Number of Target Protein: Q8WWW0

Published Application(s): WB, IF

Published Species Reactivity: Human

Immunogen: The original antibody was generated by immunizing mice against amino acids 119-416 of human NORE1A.

Specificity: The antibody reacts with NORE1A epitope located within amino acids 119-191 of the human NORE1A protein, a unique sequence in the NORE1A splice form.

Application Notes: This antibody has been used to specifically bind NORE1A in Western blots (Kuznetsov et al, 2008; pmid:19098985); it detected NORE1A in human HBEC3-KT cells (Moshnikova et al, 2006; pmid:16421102). Immunofluorescence was performed on human bronchial epithelial cells (HBEC3-KT or HBEC3-KTR) using this antibody (Moshnikova et al, 2006; pmid:16421102).

Antibody First Published in: Moshnikova et al. The growth and tumor suppressor NORE1A is a cytoskeletal protein that suppresses growth by inhibition of the ERK pathway J Biol Chem. 2006 Mar 24;281(12):8143-52. [PMID:16421102](#)

Note on publication: The article describes the generation and characterization of the antibody.

Product Form

Size: 200 µg Purified antibody.

Purification: Protein A affinity purified

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic

procedures for humans or animals.
