## Anti-complete inactivated virus [Nb7] Standard Size Ab03022-10.159

**Isotype and Format:** Human IgG1-Fc fusion

**Clone Number:** Nb7

**Alternative Name(s) of Target:** H5N1 virus

**UniProt Accession Number of Target Protein:**

**Published Application(s):** ELISA

**Published Species Reactivity:** Influenza A (H5N1)

**Immunogen:** The original antibody was generated by immunizing Bactrian camel (*Camelus bactrianus*) with inactivated influenza H5N1 virus, followed by antibody library construction and phage display-based selection.

**Specificity:** This antibody specifically binds the H5N1 virus. It does not bind to the other subtypes of influenza A viruses.

**Application Notes:** The specificity of this antibody (VHH) was confirmed in ELISA analysis. The antibody was used as a capture antibody in sandwich ELISA, where it was used in a matched pair in conjunction with Nb93; the detection limit of this method for H5N1 virus was 14.1 ng/mL. Sandwich ELISA was employed for H5N1 detection in serum samples (Zhu et al, 2014; pmid:25526777).

**Antibody First Published in:** Zhu et al. Streptavidin-biotin-based directional double Nanobody sandwich ELISA for clinical rapid and sensitive detection of influenza H5N1 *J Transl Med.* 2014 Dec 20;12:352.

[PMID:25526777](#)

**Note on publication:** The paper describes the generation and characterization of the antibody.

### Product Form

**Size:** 100 µg Purified antibody.

**Purification:** Protein A affinity purified

**Supplied In:** PBS with 0.02% Proclin 300.

**Storage Recommendation:** Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

**Concentration:** 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
