Anti-NS1 [32] Bulk Size Ab03029-23.159-BT

This chimeric rabbit antibody was made using the variable domain sequences of the original VHH format for improved compatibility with existing reagents assays and techniques.

Isotype and Format: Rabbit IgG-Fc fusion

Clone Number: 32

Alternative Name(s) of Target: Nonstructural protein 1; Zika NS1; ZVNS1; Nb32

UniProt Accession Number of Target Protein:

Published Application(s): ELISA

Published Species Reactivity: Zika Virus

Immunogen: The antibody was generated by immunizing a llama with Zika NS1 protein, followed by antibody library construction and phage display-based selection.

Specificity: The antibody binds to the NS1 protein of Zika virus. The antibody did not cross-reacted with the NS1 protein of other flaviviruses, such as Yellow fever, Dengue type 1, West Nile, and Saint Louis viruses.

Application Notes: This antibody can be used to specifically detect the Zika virus as it is not cross-reactive with other Flaviviridae. The specificity of this antibody (VHH) was confirmed by ELISA analysis. Furthermore, the antibody was employed in sandwich ELISA as the detection antibody, where it was used in a matched pair in conjunction with D6. The sandwich ELISA accurately detected Zika virus NS1 protein in different serum samples in the low-ng/mL range (Delfin-Riela et al, 2020; PMID:33317184).

Antibody First Published in: Delfin-Riela et al. Highly Sensitive Detection of Zika Virus Nonstructural Protein 1 in Serum Samples by a Two-Site Nanobody ELISA Biomolecules. 2020 Dec 9;10(12):1652.

[PMID:33317184](#)

Note on publication: The paper describes the generation and characterization of the antibody, which is specific for Zika virus NS1 protein.

Product Form

Size: 1 mg Purified antibody in bulk size.

Purification: Protein A affinity purified

Supplied In: PBS only.

Storage Recommendation: Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer

storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
