## Anti-IL-8 [M36-11] Standard Size Ab03217-3.3

This antibody was created using our proprietary Fc Silent™ engineered Fc domain containing key point mutations that abrogate binding to Fc gamma receptors.

This chimeric mouse antibody was made using the variable domain sequences of the original Human IgG1 format for improved compatibility with existing reagents assays and techniques.

**Isotype and Format:** Mouse IgG2b, [Fc Silent™](#), Lambda

**Clone Number:** M36-11

**Alternative Name(s) of Target:** IL8; Interleukin-8; CXCL8; C-X-C motif chemokine 8; Chemokine (C-X-C motif) ligand 8; Emotakin; Granulocyte chemotactic protein 1; GCP-1; Monocyte-derived neutrophil chemotactic factor; MDNCF; Monocyte-derived neutrophil-activating peptide; MONAP; Neutrophil-activating protein 1; NAP-1; Protein 3-10C; T-cell chemotactic factor; 4-123-36

**UniProt Accession Number of Target Protein:** P10145

**Published Application(s):** Block, ELISA

**Published Species Reactivity:** Human

**Immunogen:** The original antibody 4-123-36 was isolated from a human single domain antibody (scFv) library by screening the library against extracellular portions of the human IL-8. Affinity maturation of this clone using mutagenesis by error-prone PCR resulted in the generation of M36-11.

**Specificity:** This antibody binds human interleukin-8. Interleukin-8 is a chemotactic factor that attracts neutrophils, basophils, and T-cells, but not monocytes. It is also involved in neutrophil activation. It is released from several cell types in response to an inflammatory stimulus.

**Application Notes:** The binding of this affinity-matured antibody to hIL8 was analyzed using ELISA. This antibody is capable of blocking the biological activity of human interleukin 8 at a concentration of 1 and 10 µg/mL in a neutrophil chemotaxis assay (PMID: 20718039).

**Antibody First Published in:** Ding et al. Generation of high-affinity fully human anti-interleukin-8 antibodies from its cDNA by two-hybrid screening and affinity maturation in yeast. Protein Sci. 2010 Oct; 19(10): 1957-1966. [PMID:20718039](#)

**Note on publication:**

## Product Form

**Size:**

200 µg Purified antibody.

**Purification:** Protein A affinity purified

**Supplied In:** PBS with 0.02% Proclin 300.

**Storage Recommendation:** Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

**Concentration:** 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
