Anti-Capsular polysaccharide [H17-1] Standard Size Ab03268-23.0

This chimeric rabbit antibody was made using the variable domain sequences of the original Mouse IgG2a format for improved compatibility with existing reagents assays and techniques.

Isotype and Format: Rabbit IgG, Kappa

Clone Number: H17-1

Alternative Name(s) of Target: MenW; NmW; Neisseria meningitidis serogroup W

UniProt Accession Number of Target Protein:

Published Application(s): ELISA

Published Species Reactivity: Neisseria meningitidis serogroup W

Immunogen: The original antibody was generated by immunizing BP2 (BiozziABH/RijHsd mice) with 0.2 ml of a suspension of 10^8 freshly heat-inactivated NmW bacteria at two weeks intervals.

Specificity: This antibody is specific for capsular polysaccharides of Neisseria meningitidis serogroup W.

Application Notes: This antibody can be used for the detection of capsular polysaccharides of Neisseria meningitidis serogroup W using an ELISA. This antibody was also used in the development of a rapid test for detecting the capsular polysaccharide (cps) antigen of serogroup W of Neisseria meningitidis (WO2018099972).

Antibody First Published in: [PMID:](#)

Note on publication:

Product Form

Size: 200 µg Purified antibody.

Purification: Protein A affinity purified

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
