Anti-Calponin protein [24H5] Standard Size Ab03312-10.0

This chimeric human antibody was made using the variable domain sequences of the original Mouse IgG2b format for improved compatibility with existing reagents assays and techniques.

Isotype and Format: Human IgG1, Kappa

Clone Number: 24H5

Alternative Name(s) of Target: CAP; Calponin-2; Calponin H2, smooth muscle; Neutral calponin; CGMCNO 20775

UniProt Accession Number of Target Protein: Q99439

Published Application(s): WB, IHC

Published Species Reactivity: Human

Immunogen: The original antibody was generated by immunizing mice with Calponin protein.

Specificity: The antibody is specific for calponin protein. Calponin protein is a thin filament-associated protein that is implicated in the regulation and modulation of smooth muscle contraction. It is capable of binding to actin, calmodulin and tropomyosin. Further, the interaction of calponin with actin inhibits the actomyosin Mg-ATPase activity.

Application Notes: The antibody specifically detected Calponin beta protein in Western blot analysis. The antibody 24H5 and the commercial antibody CALP were used to stain uterine fibroids and liver tissue. Results showed the antibody specificity is comparable to the commercial antibody. Further, the sensitivity of the antibody 24H5 was higher than the commercial antibody (CN113234155A).

Antibody First Published in: [PMID:](#)

Note on publication:

Product Form

Size: 200 µg Purified antibody.

Purification: Protein A affinity purified

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
