## Anti-Calponin protein [24H5] Standard Size Ab03312-3.0

**Isotype and Format:** Mouse IgG2b, Kappa

**Clone Number:** 24H5

**Alternative Name(s) of Target:** CAP; Calponin-2; Calponin H2, smooth muscle; Neutral calponin; CGMCNO 20775

**UniProt Accession Number of Target Protein:** Q99439

**Published Application(s):** WB, IHC

**Published Species Reactivity:** Human

**Immunogen:** The original antibody was generated by immunizing mice with Calponin protein.

**Specificity:** The antibody is specific for calponin protein. Calponin protein is a thin filament-associated protein that is implicated in the regulation and modulation of smooth muscle contraction. It is capable of binding to actin, calmodulin and tropomyosin. Further, the interaction of calponin with actin inhibits the actomyosin Mg-ATPase activity.

**Application Notes:** The antibody specifically detected Calponin beta protein in Western blot analysis. The antibody 24H5 and the commercial antibody CALP were used to stain uterine fibroids and liver tissue. Results showed the antibody specificity is comparable to the commercial antibody. Further, the sensitivity of the antibody 24H5 was higher than the commercial antibody (CN113234155A).

**Antibody First Published in:** [PMID:](#)

**Note on publication:**

### Product Form

**Size:** 200 µg Purified antibody.

**Purification:** Protein A affinity purified

**Supplied In:** PBS with 0.02% Proclin 300.

**Storage Recommendation:** Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

**Concentration:** 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
