## Anti-CD5 [11H3] Standard Size Ab03315-23.0

This chimeric rabbit antibody was made using the variable domain sequences of the original Mouse IgG1 format for improved compatibility with existing reagents assays and techniques.

**Isotype and Format:** Rabbit IgG, Kappa

Clone Number: 11H3

**Alternative Name(s) of Target:** SP19; TA347; T-cell surface glycoprotein CD5; Lymphocyte antigen

T1/Leu-1; CGMCCNO 20767

**UniProt Accession Number of Target Protein:** P06127

Published Application(s): WB, ELISA, IHC Published Species Reactivity: Human

**Immunogen:** The original antibody was generated by immunizing mice with recombinant CD5 protein. **Specificity:** The antibody is specific for CD5. CD5 is a cluster of differentiation expressed on the surface of T cells of various species and in a subset of murine B cells known as B-1a. It may act as a receptor in regulating T-cell proliferation.

**Application Notes:** The antibody specifically detected CD5 protein in Western blot analysis. The antibody 11H3 and the commercial antibody SP19 were used to stain T cell lymphoma. Results showed the antibody specificity is comparable to the commercial antibody. Further, the sensitivity of the antibody 11H3 was higher than the commercial antibody. The antibody and the commercially available antibody TA347 were simultaneously detected on the normal tissue chip, indicating that the specificity of the antibody in normal tissue was equivalent to that of the commercially available antibody. (CN113105547A).

**Antibody First Published in: PMID:** 

Note on publication:

#### **Product Form**

**Size:** 200 µg Purified antibody.

**Purification:** Protein A affinity purified **Supplied In:** PBS with 0.02% Proclin 300.

**Storage Recommendation:** Store at 4°C for up to 3 months. For longer storage, aliquot and store at -

20°C.

**Concentration:** 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic
