## Anti-TCR betaF1 [38C2] Standard Size Ab03317-23.0

This chimeric rabbit antibody was made using the variable domain sequences of the original Mouse IgG2a format for improved compatibility with existing reagents assays and techniques.

**Isotype and Format:** Rabbit IgG, Kappa

**Clone Number:** 38C2

**Alternative Name(s) of Target:** TCRβF1; T cell antigen receptor markers β1; CGMCCNO 20778

**UniProt Accession Number of Target Protein:**

**Published Application(s):** WB, ELISA, IHC

**Published Species Reactivity:** Human

**Immunogen:** The original antibody was generated by immunizing mice with TCRβF1 protein.

**Specificity:** The antibody is specific for TCRβF1.

**Application Notes:** The antibody specifically detected TCRβF1 protein in Western blot analysis. The antibody 38C2 and the commercial antibody 8A3 were used to stain Hodgkin's lymphoma and tonsil tissue. Results showed the antibody specificity is comparable to the commercial antibody. Further, the sensitivity of the antibody 32D5 was higher than the commercial antibody. The antibody and the commercially available antibody EPR20374 were simultaneously detected on the normal tissue chip, indicating that the specificity of the antibody in normal tissue was equivalent to that of the commercially available antibody (CN113307875A).

**Antibody First Published in:** [PMID:](#)

**Note on publication:**

### Product Form

**Size:** 200 µg Purified antibody.

**Purification:** Protein A affinity purified

**Supplied In:** PBS with 0.02% Proclin 300.

**Storage Recommendation:** Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

**Concentration:** 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
