Anti-Progesterone Receptor [14B3] Bulk Size, 1 mg, Ab03318-23.0-BT View online

Anti-Progesterone Receptor [14B3] Bulk Size Ab03318-23.0-BT

Isotype and Format: Rabbit IgG, Kappa Clone Number: 14B3 Alternative Name(s) of Target: PR; Nuclear receptor subfamily 3 group C member 3 UniProt Accession Number of Target Protein: P06401

Published Application(s): WB, ELISA, IHC

Published Species Reactivity: Human

Immunogen: The original antibody was generated by immunizing rabbits with PR protein. **Specificity:** The antibody is specific for PR protein. PR is a protein molecule, a cellular core receptor belonging to a steroidal superfamily, which can be bonded to the corresponding hormone to form a hormone-receptor complex, enabling hormones to exert their biological effects.

Application Notes: The specificity of the original format of the antibody was confirmed by ELISA analysis (affinity constant of 1.82×10^{10} M-1). The antibody specifically detected PR protein in Western blot analysis. The antibody 14B3 and the commercial antibody 1E2 were used to stain breast cancer and endometrial. Results showed the antibody specificity is comparable to the commercial antibody. Further, the sensitivity of the antibody 14B3 was higher than the commercial antibody (CN113583132A). **Antibody First Published in:** PMID:

Note on publication:

Product Form

Size: 1 mg Purified antibody in bulk size.Purification: Protein A affinity purifiedSupplied In: PBS only.

Storage Recommendation: Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommed this antibody be handled under sterile conditions. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
