Anti-Cytokeratin 19 [RCK108] Standard Size Ab03341-10.0

Isotype and Format: Human IgG1, Kappa

Clone Number: RCK108

Alternative Name(s) of Target: K19; CK-19; Keratin type I cytoskeletal 19; Cytokeratin-19; Keratin-19

UniProt Accession Number of Target Protein: P08727

Published Application(s): IHC

Published Species Reactivity: Zebrafish, Human

Immunogen: The original antibody was generated by immunizing mice with cell line T24.

Specificity: The antibody is specific for Cytokeratin 19. Cytokeratin 19 is found in most simple epithelia and non keratinized squamous epithelia with predominant focal reactivity.

Application Notes: The antibody could be used as a broad epithelial marker for carcinoma detection, due to its reproducible and highly sensitive staining. The antibody stained practically all epithelial tumours, especially adenocarcinoma, but it is negative in hepatocellular carcinoma (Kwaspen et al., 1997; PMID: 9447381). Antibody RCK108 reacts with a 40 kDa keratin (Cytokeratin 19) in immunoblot.

Antibody First Published in: [PMID:](#)

Note on publication:

Product Form

Size: 100 µg Purified antibody.

Purification: Protein A affinity purified

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
