Anti-CD23 [9D11B6E6] Bulk Size Ab03401-1.1-BT

Isotype and Format: Mouse IgG1, Kappa

Clone Number: 9D11B6E6

Alternative Name(s) of Target: CGMCC No. 19689; Low affinity immunoglobulin epsilon Fc receptor; BLAST-2; C-type lectin domain family 4 member J; Fc-epsilon-RII; Immunoglobulin E-binding factor;

Lymphocyte IgE receptor; SP23; FcERII

UniProt Accession Number of Target Protein: P06734

Published Application(s): IHC

Published Species Reactivity: Human

Immunogen: The original antibody was generated by immunizing mice with CD23.

Specificity: The antibody is specific for CD23. CD23 is a low-affinity receptor for immunoglobulin E (IgE) and CR2/CD21. It has essential roles in the regulation of IgE production and in the differentiation of B-cells (it is a B-cell-specific antigen).

Application Notes: The antibody 9D11B6E6 and the commercial antibody SP23 were used to stain B-cell lymphoma. Results showed the antibody specificity is comparable to the commercial antibody. Further, the sensitivity of the antibody 9D11B6E6 was higher than the commercial antibody. The antibody and the commercially available antibody SP23 were simultaneously detected on the normal tissue chip, indicating that the specificity of the antibody in normal tissue was equivalent to that of the commercially available antibody (CN112442124B).

Antibody First Published in: PMID:

Note on publication:

Product Form

Size: 1 mg Purified antibody in bulk size. **Purification:** Protein A affinity purified

Supplied In: PBS only.

Storage Recommendation: Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommed this antibody be handled under sterile conditions. For longer

storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note – This product is for r procedures for humans or animals.	esearch use only.	It is not intended	for use in therape	eutic or diagnostic
