Anti-INHibin- α [15E11D5E11] Standard Size Ab03405-10.3

This antibody was created using our proprietary Fc Silent™ engineered Fc domain containing key point mutations that abrogate binding to Fc gamma receptors.

This chimeric human antibody was made using the variable domain sequences of the original Mouse IgG1 format for improved compatibility with existing reagents assays and techniques.

Isotype and Format: Human IgG1, Fc Silent™, Kappa

Clone Number: 15E11D5E11

Alternative Name(s) of Target: CGMCC No. 22320; inhibin- α protein; Inhibin alpha chain

UniProt Accession Number of Target Protein: P05111

Published Application(s): IHC

Published Species Reactivity: Human

Immunogen: The original antibody was generated by immunizing Balb/c mice with INHibin- α .

Specificity: The antibody is specific for INHibin- α . Inhibin is one of the important hormones regulated by the hypothalamic-pituitary-gonadal axis system. Inhibin is a member of the TGF- β family, by reducing the transcription of the follicle-stimulating hormone gene and down-regulating the gonadotropin-releasing hormone receptor, it exerts local effects in the form of paracrine and autocrine, and inhibits the basic and receptor of the anterior pituitary gland.

Application Notes: The antibody was used to stain ovarian sex cord stromal tumor in immunohistochemical analysis (CN114075281A).

Antibody First Published in: [PMID:](#)

Note on publication:

Product Form

Size: 200 μ g Purified antibody.

Purification: Protein A affinity purified

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic

procedures for humans or animals.
