## Anti-GP25-200 [4H9] Ab03422-1.1-BT

**Isotype and Format:** Mouse IgG1, Kappa

**Clone Number:** 4H9

**Alternative Name(s) of Target:** GP25-200 antigen

**UniProt Accession Number of Target Protein:**

**Published Application(s):** therapeutic, WB, ELISA

**Published Species Reactivity:** Cryptosporidium parvum

**Immunogen:** The original antibody was generated by immunizing female BALB/c mice intraperitoneally and subcutaneously with purified P23 emulsified in monophosphoryl A-trehalose dimycolate adjuvant.

**Specificity:** This antibody binds the GP25-200 antigen of *Cryptosporidium parvum*. *Cryptosporidium parvum* is a coccidian parasite that infects intestinal epithelium and causes diarrheal disease in humans and other agriculturally important food animals for which specific therapy and immunoprophylaxis are unavailable. Cryptosporidiosis is self-limiting in hosts with normal immune systems; however, in neonates, the elderly, and hosts having congenital or acquired immunodeficiency diseases or chemotherapy-induced immunosuppression, cryptosporidial enterocolitis may become chronic and have severe consequences.

**Application Notes:** This antibody can be used for the identification of sporozoites and GP25-200 antigen of *C. parvum* using western blot. The identification of sporozoite-neutralizing antibody was done using ELISA (PMID: 10768951). This antibody in combination with PLA2 or LL37 was also used in the generation of a biocide fusion proteins to kill *C. parvum* sporozoites in vitro and in vivo (PMID: 20086143).

**Antibody First Published in:** Schaefer et al. Characterization and formulation of multiple epitope-specific neutralizing monoclonal antibodies for passive immunization against cryptosporidiosis. *Infect Immun.* 2000 May;68(5):2608-16. [PMID:10768951](#)

**Note on publication:** Describes the generation and characterization of antibodies against multiple epitope of *C. parvum* to provide passive immunization against Cryptosporidiosis.

## Product Form

**Size:** 1 mg Purified antibody in bulk size.

**Purification:** Protein A affinity purified

**Supplied In:** PBS only.

**Storage Recommendation:** Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer

storage, aliquot and store at -20°C.

**Concentration:** 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
