## Anti-Canine distemper virus [2G3] Ab03470-21.0-BT

This antibody does not have a J-chain and therefore presents as a hexamer, rather than a pentamer.

This reformatted mouse antibody was made using the variable domain sequences of the original Mouse IgG1 format for improved compatibility with existing reagents assays and techniques.

Isotype and Format: Mouse IgM, Kappa

Clone Number: 2G3

**Alternative Name(s) of Target:** CDV

UniProt Accession Number of Target Protein: Published Application(s): neutralize, ELISA

Published Species Reactivity: Canine distemper virus

**Immunogen:** The original antibody was generated by immunizing mice with canine distemper virus CVCC AV299 strain.

**Specificity:** This antibody binds canine distemper virus (CDV). Canine distemper is a viral disease caused by CDV that attacks the respiratory, gastrointestinal and nervous systems of puppies and dogs. The virus can also be found in wildlife such as foxes, wolves, coyotes, raccoons, skunks, mink and ferrets and has been reported in lions, tigers, leopards and other wild cats as well as seals.

**Application Notes:** The binding characterization of this antibody to canine distemper virus antigen was done using ELISA. This antibody is capable of neutralizing canine distemper virus in vitro (CN103059133).

**Antibody First Published in: PMID:** 

Note on publication:

#### **Product Form**

Size: 1 mg Purified antibody in bulk size.

**Purification:** Affinity Purified using a recombinant lectin column

Supplied In: PBS only.

**Storage Recommendation:** Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommed this antibody be handled under sterile conditions. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic
