Anti-GFP [Clone 1] Bulk Size Ab03481-23.159-BT

Isotype and Format: Rabbit IgG-Fc fusion

Clone Number: Clone 1

Alternative Name(s) of Target: Green fluorescent protein

UniProt Accession Number of Target Protein: P42212

Published Application(s): FC

Published Species Reactivity: Aequorea victoria (Water jellyfish, Mesonema victoria)

Immunogen: The original antibody was isolated from a nanobody library derived from a llama immunized with green fluorescent protein using yeast surface display platform.

Specificity: This antibody binds green fluorescent protein.

Application Notes: The binding characterization of this antibody for green fluorescent protein was done using flow cytometry. The binding affinity of this antibody for GFP was calculated to be $K_d = 2.6\text{nM}$ (PMID: 19861136).

Antibody First Published in: Ryckaert et al. Isolation of antigen-binding camelid heavy chain antibody fragments (nanobodies) from an immune library displayed on the surface of *Pichia pastoris*. *J Biotechnol.* 2010 Jan 15;145(2):93-8. [PMID:19861136](#)

Note on publication: Describes the use of a yeast surface display platform for rapid discovery of conformationally selective nanobodies.

Product Form

Size: 1 mg Purified antibody in bulk size.

Purification: Protein A affinity purified

Supplied In: PBS only.

Storage Recommendation: Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
