## Anti-Digoxigenin B [Clone 2] Ab03497-23.0-BT

This full-length chimeric rabbit antibody was made using the variable domain sequences of the original Human scFv format for improved compatibility with existing reagents assays and techniques.

**Isotype and Format:** Rabbit IgG, Lambda

**Clone Number:** Clone 2

**Alternative Name(s) of Target:** Digoxigenin; DigB; DOG; ChEBI: 42098; CAS:1672-46-4

**UniProt Accession Number of Target Protein:**

**Published Application(s):** ELISA

**Published Species Reactivity:** Species independent

**Immunogen:** The original antibody was isolated from a IgM-derived phage antibody library created from the peripheral blood lymphocytes of 20 non-immunized donors. The specific clone was isolated by panning the library against digoxigenin.

**Specificity:** This antibody is specific for digoxigenin A. Digoxigenin (DIG) is a hydroxy steroid that consists of 5beta-cardanolide, found exclusively in the flowers and leaves of the plants *Digitalis purpurea*, *Digitalis orientalis* and *Digitalis lanata*. It is a hapten, a small molecule with high antigenicity, that is used in many molecular biology applications.

**Application Notes:** The binding specificity of this antibody for digoxigenin was checked using ELISA. This antibody was able to bind digoxigenin coupled by a methylcarbonyl (Dig-Met) or succinyl (Dig-Suc) type linker to BSA. The presence of Dig-dUTP conjugate resulted in competitive inhibition on binding of this antibody to digoxigenin coupled with methylcarbonyl (Dig-Met) linked to BSA (PMID: 9305722).

**Antibody First Published in:** Dörsam et al. Antibodies to steroids from a small human naive IgM library. *FEBS Lett.* 1997 Sep 1;414(1):7-13. [PMID:9305722](#)

**Note on publication:** Describes the generation of antibodies against steroids from a human naive IgM library.

## Product Form

**Size:** 1 mg Purified antibody in bulk size.

**Purification:** Protein A affinity purified

**Supplied In:** PBS only.

**Storage Recommendation:** Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer

storage, aliquot and store at -20°C.

**Concentration:** 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
