## Anti-virus particles [A1] Ab03519-23.0-BT

This full-length chimeric rabbit antibody was made using the variable domain sequences of the original Mouse scFv format for improved compatibility with existing reagents assays and techniques.

**Isotype and Format:** Rabbit IgG, Kappa

**Clone Number:** A1

**Alternative Name(s) of Target:** WSSV

**UniProt Accession Number of Target Protein:**

**Published Application(s):** ELISA

**Published Species Reactivity:** White spot syndrome virus

**Immunogen:** The original antibody was generated by immunizing mice with WSSV followed by antibody library construction and phage display-based selection.

**Specificity:** The antibody is specific for WSSV. The antibody binds to native WSSV, and not to the denatured WSSV.

**Application Notes:** The binding specificity of the scFv antibody was determined by ELISA (Dai et al., 2003; PMID: 12969566 and Yuan et al., 2006; PMID: 17140131). The antibody had an affinity constant ( $K_{aff}$ ) of  $2.02 \times 10^9 \text{ M}^{-1}$ . Dot blot assays showed that the antibody could detect WSSV directly from shrimp hemolymph after 24-h feeding infection by WSSV (Dai et al., 2003; PMID: 12969566).

**Antibody First Published in:** Dai et al. Construction and characterization of a novel recombinant single-chain variable fragment antibody against White Spot Syndrome Virus from shrimp J Immunol Methods. 2003 Aug;279(1-2):267-75. [PMID:12969566](#)

**Note on publication:** The original paper describes the generation and characterization of the antibody by phage display method.

## Product Form

**Size:** 1 mg Purified antibody in bulk size.

**Purification:** Protein A affinity purified

**Supplied In:** PBS only.

**Storage Recommendation:** Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer storage, aliquot and store at -20°C.

**Concentration:**

1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
