Anti-gp140 [VHH5] Standard Size Ab03521-23.159

Isotype and Format: Rabbit IgG-Fc fusion

Clone Number: VHH5

Alternative Name(s) of Target: gp140 SOSIP

UniProt Accession Number of Target Protein:

Published Application(s): crystallization, neutralization, ELISA

Published Species Reactivity: HIV-1

Immunogen: The original antibody was generated by immunizing dromedaries with the trimeric subtype C gp140 SOSIPs followed by antibody library construction and phage display-based selection.

Specificity: The antibody is specific for gp140 SOSIP of subtype C.

Application Notes: The specificity of the original format of the antibody was confirmed by competition ELISA analysis. The structure of the antibody was determined. The antibody was able to neutralize subtype C of HIV (Koch et al. 2017; pmid:28827559).

Antibody First Published in: Koch et al. Selection of nanobodies with broad neutralizing potential against primary HIV-1 strains using soluble subtype C gp140 envelope trimers Sci Rep. 2017 Aug 21;7(1):8390.

[PMID:28827559](#)

Note on publication: The original paper describes the generation and characterization of a set of antibodies obtained by phage display.

Product Form

Size: 100 µg Purified antibody.

Purification: Protein A affinity purified

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
