Anti-gp41 [A7] Ab03525-30.11-BT

This is an scFv fragment with a His tag.

Isotype and Format: scFv fragment (His), ScFv

Clone Number: A7

Alternative Name(s) of Target: Envelope glycoprotein GP41; transmembrane protein gp41

UniProt Accession Number of Target Protein:

Published Application(s): in vitro neutralization, ELISA

Published Species Reactivity: HIV-1

Immunogen: A phage immune library generated from a long-term non-progressors with HIV neutralizing antibodies in his plasma. The phage library was screened on recombinant soluble gp140 envelope (Env) proteins and the antibody was isolated.

Specificity: The antibody is specific for gp41, and it binds to structural elements of the third variable loop V3.

Application Notes: The specificity of the original format of the antibody was confirmed by ELISA analysis. The antibody showed neutralizing activity against a panel of standardized Tier 1 and Tier 2 HIV-1 pseudo virions on Tzm-bl cells (Trott et al., 2014; PMID:24828352).

Antibody First Published in: Trott et al. Functional characterization of two scFv-Fc antibodies from an HIV controller selected on soluble HIV-1 Env complexes: a neutralizing V3- and a trimer-specific gp41 antibody PLoS One. 2014 May 14;9(5):e97478. [PMID:24828352](#)

Note on publication: The original paper describes the generation and characterization of the antibody.

Product Form

Size: 500 µg Purified antibody in bulk size.

Purification: Purified by Immobilized Metal Affinity Chromatography

Supplied In: PBS only.

Storage Recommendation: Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
