Anti-nucleocapsid protein [puu41] Ab03528-10.29-BT

This is a Fab fragment with His tag.

Isotype and Format: Human Fab fragment, His-Tagged, Kappa

Clone Number: puu41

Alternative Name(s) of Target: N protein; Nucleoprotein; Protein N

UniProt Accession Number of Target Protein: P27313

Published Application(s): EIA, IF

Published Species Reactivity: Puumala hantavirus

Immunogen: The original scFv antibody was selected from a human library prepared from the spleen of a PUU-immune individual by panning against the nucleocapsid protein of Puumala virus.

Specificity: The antibody binds the nucleoprotein of Puumala virus.

Application Notes: Immunofluorescence was performed on Vero E6 cells infected with PUU using this antibody. The antibody showed a strong reactivity against PUU-N in EIA (Salonen et al., 1998; PMID: 9568958).

Antibody First Published in: Salonen et al. Human recombinant Puumala virus antibodies: cross-reaction with other hantaviruses and use in diagnostics J Gen Virol. 1998 Apr;79 (Pt 4):659-65. [PMID:9568958](#)

Note on publication: The original paper describes the generation and characterization of the antibody.

Product Form

Size: 500 µg Purified antibody in bulk size.

Purification: Purified by Immobilized Metal Affinity Chromatography

Supplied In: PBS only.

Storage Recommendation: Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
