Anti- mouse Bcl-3 [ham150-3.5] Ab03543-10.0-BT

This chimeric human antibody was made using the variable domain sequences of the original Hamster IgG format for improved compatibility with existing reagents assays and techniques.

Isotype and Format: Human IgG1, Lambda

Clone Number: ham150-3.5

Alternative Name(s) of Target: B-cell lymphoma 3 protein homolog

UniProt Accession Number of Target Protein: Q9Z2F6

Published Application(s): WB, ELISA, FC

Published Species Reactivity: Human, Mouse

Immunogen: The original antibody was generated from a hamster immunized with mouse BCL-3.

Specificity: The antibody is specific for BCL-3. B cell Lymphoma 3 is a member of the I κ B subfamily of inhibitors. This subfamily is part of the NF- κ B transcription factor protein family and it is suggested that a balance in the concentration of various NF- κ B family members regulates apoptosis and survival of activated T cells.

Application Notes: The specificity of the original format of the antibody for mBcl-3 was confirmed by ELISA analysis. The antibody detected mBcl-3 and human Bcl-3 by western blot (Bassetti et al. 2009; PMID: 19208752).

Antibody First Published in: Bassetti et al. Transgenic Bcl-3 slows T cell proliferation. Int Immunol. 2009 Apr; 21(4): 339-348. [PMID:19208752](#)

Note on publication: The original paper describes the generation and characterization of the antibody.

Product Form

Size: 1 mg Purified antibody in bulk size.

Purification: Protein A affinity purified

Supplied In: PBS only.

Storage Recommendation: Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
