## Anti-Bordetella pertussis cells [scFv 18] Standard Size Ab03579-30.11

This is an scFv fragment with a His tag.

**Isotype and Format:** scFv fragment (His), ScFv

**Clone Number:** scFv 18

**Alternative Name(s) of Target:** filamentous hemagglutinin; FHA; pertactin; PRN; pertactin autotransporter; P.93; Pertactin; Filamentous hemagglutinin transporter protein FhaC; TpsB transporter; fhaC

**UniProt Accession Number of Target Protein:** P14283; P35077

**Published Application(s):** functional assay, ELISA

**Published Species Reactivity:** Bordetella pertussis

**Immunogen:** This antibody was generated by immunizing a BALB/c mouse with 0.1 ml of the commercial pertussis vaccine Quadracel. From this DNA a phage display library was created and panned against B. pertussis whole cells so find this clone.

**Specificity:** This antibody is specific for pertactin and filamentous hemagglutinin of Bordetella pertussis. Filamentous hemagglutinin is a member of a two partner secretion pathway (TPS) in which it mediates the secretion of filamentous hemagglutinin FHA (fhaB). Pertactin may have a role in bacterial adhesion, and thus play a role in virulence.

**Application Notes:** The scFv version of this antibody was used for an ELISA on filamentous hemagglutinin (FHA), pertactin (PRN) and B. pertussis cells. The antibody was positive very every antigen tested. The scFv version of this antibody was tested for its ability to inhibit B. pertussis binding to HEp-2 cells, it did not show any inhibition. (Hussein et al, 2007; pmid:17724067).

**Antibody First Published in:** Hussein et al. Construction and Characterization of Single-Chain Variable Fragment Antibodies Directed against the Bordetella pertussis Surface Adhesins Filamentous Hemagglutinin and Pertactin. Infect Immun. 2007 Nov; 75(11): 5476-5482. [PMID:17724067](#)

**Note on publication:** A single-chain variable fragment (scFv) antibody library against Bordetella pertussis was constructed using M13 phage display.

### Product Form

**Size:** 50 µg Purified antibody.

**Purification:**

Purified by Immobilized Metal Affinity Chromatography

**Supplied In:** PBS with 0.02% Proclin 300.

**Storage Recommendation:** Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

**Concentration:** 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
