Anti-HLA-G [9Y5G6] Standard Size Ab03657-10.3

This antibody was created using our proprietary Fc Silent™ engineered Fc domain containing key point mutations that abrogate binding to Fc gamma receptors.

This is a reformatted human IgG1 Fc Silent Fc Silent™ antibody, based on the original human IgG1 format, created for improved compatibility with existing reagents, assays and techniques.

Isotype and Format: Human IgG1, Fc Silent™, Kappa

Clone Number: 9Y5G6

Alternative Name(s) of Target: HLAG; HLA-6.0; HLA-G5; HLAG-6; HLA class I histocompatibility antigen alpha chain G; HLA G antigen; MHC class I antigen G; HLA-G1sol; HLA-G2sol

UniProt Accession Number of Target Protein: P17693

Published Application(s): WB, ELISA, IHC

Published Species Reactivity: Human

Immunogen: The original antibody was generated by immunizing BALB/c mice with synthetic human HLA-G molecule heavy chain amino acid sequence '229SKEGDGGIMSVRSLSED319'.

Specificity: This antibody specifically binds the amino acid sequence 'SKEGDGGIMSVRSLSED' of the human HLA-G5 and HLA-G6. HLA-G5 and HLA-G6 are secreted forms of HLA-G that are non-classical major histocompatibility class Ib molecules involved in immune regulatory processes at the maternal-fetal interface. HLA-G expression has been reported in numerous types of cancer, always associated with more advanced stage and aggressive development of the tumor.

Application Notes: This antibody can bind human HLA-G peptide 'KEGDGGIMSVRSLSED' in an ELISA with a binding affinity of $K_a = 1.5 \times 10^{11}$ L/mol. This antibody was capable of detecting G5 and G6 isoforms of human HLA-G in a western blot and does not cross react with any other isoforms of HLA-G. This antibody can also be used for the immunohistochemical detection of HLA-G5 and HLA-G6 molecules in different gastric cancer tissues using immunohistochemistry (CN113045656).

Note on publication:

Product Form

Size: 100 µg Purified antibody.

Purification:

Protein A affinity purified

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
