Anti-Morphine [9B1] Bulk Size Ab03753-23.0-BT

Isotype and Format: Rabbit IgG, Lambda

Clone Number: 9B1

Alternative Name(s) of Target: Morphium; 6-MAM; 6-monoacetylmorphine; heroin; hydrocodone; opioids; opium; ChEBI: 17303

UniProt Accession Number of Target Protein:

Published Application(s): ELISA

Published Species Reactivity: Species independent

Immunogen: The original antibody was generated by immunizing mouse with 3-carboxymethyl-morphine conjugated to bovine serum albumin.

Specificity: This antibody binds morphine and cross reacts with multiple addictive opioids including 6-MAM, morphine, heroin, and hydrocodone, shows weak binding for meperidine, oxycodone and fentanyl without significant binding to currently available OUD treatment agents naloxone, naltrexone, and buprenorphine. Morphine is a strong opiate that is found naturally in opium, a dark brown resin in poppies (*Papaver somniferum*). It is considered the classic opioid analgesic, most commonly used in pain management, morphine provides major relief to patients afflicted with pain. It is a non-synthetic narcotic with a high potential for abuse.

Application Notes: The original IgG antibody binds morphine with a binding affinity of $K_D = 33.7 \text{ nM}$, and also binds 6-MAM ($K_D = 4.8 \text{ nM}$), heroin ($K_D = 1.3 \text{ nM}$) and hydrocodone ($K_D = 8.2 \text{ nM}$) (PMID: 33356138). The binding ability of this antibody to a variety of drugs was determined using ELISA (PMID: 33356138).

Antibody First Published in: Pozharski et al. Anchoring a cationic ligand: the structure of the Fab fragment of the anti-morphine antibody 9B1 and its complex with morphine. *J Mol Biol.* 2004 Mar 26;337(3):691-7. [PMID:15019787](#)

Note on publication: Describes the crystal structure of this antibody in combination with morphine.

Product Form

Size: 1 mg Purified antibody in bulk size.

Purification: Protein A affinity purified

Supplied In: PBS only.

Storage Recommendation: Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer

storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
