Anti-6G1 idiotype [AI-G1] Standard Size Ab03759-1.1

Isotype and Format: Mouse IgG1, Kappa

Clone Number: AI-G1

Alternative Name(s) of Target: 6G1; anti-idiotypic monoclonal antibody 6G1; opioid receptor

UniProt Accession Number of Target Protein:

Published Application(s): ELISA

Published Species Reactivity: Species independent

Immunogen: The original antibody was generated by immunizing mouse with anti-morphine antibody 6G1 conjugated with KLH.

Specificity: This antibody specifically binds anti-morphine antibody 6G1. It is an idiotypic antibody which exhibits the antigenic properties of morphine, binds to opioid receptors. When used for immunization, it induces the production of antibodies that specifically recognize morphine derivatives like 6-hemisuccinyl (GSM), 3-O-carboxymethyl (KMM) and 2-p-carboxy-phenylazomethyl (FAM) esters.

Application Notes: This antibody is capable of binding to opioid receptors on T98G human glioblastoma cells. This antibody could also recognize conjugate of mAb 6G1 - horseradish peroxidase with 6-hemisuccinyl morphine ester-BSA in an ELISA. When rabbits were immunized with AI-G1 antibody, they generated antibodies that were capable of recognizing all tested derivatives of morphine (RU2717989).

Antibody First Published in: [PMID:](#)

Note on publication:

Product Form

Size: 100 µg Purified antibody.

Purification: Protein A affinity purified

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
