Anti-UL42 [5F8] Standard Size Ab03851-10.3

This antibody was created using our proprietary Fc Silent™ engineered Fc domain containing key point mutations that abrogate binding to Fc gamma receptors.

This is a reformatted human IgG1 Fc Silent Fc Silent™ antibody, based on the original human IgG2b format, created for improved compatibility with existing reagents, assays and techniques.

Isotype and Format: Human IgG1, Fc Silent™, Kappa

Clone Number: 5F8

Alternative Name(s) of Target: PRV; Aujeszky's disease

UniProt Accession Number of Target Protein: P36702

Published Application(s): WB, ELISA

Published Species Reactivity: pseudorabies

Immunogen: The original antibody was generated immunizing BALB/c mice with a recombinant form of UL42.

Specificity: The antibody is specific for UL42 protein. The antibody recognises an epitope including residues 342–367 (sequence RMYTPIAK).

Application Notes: The specificity of the original format of the antibody was confirmed by ELISA analysis. The antibody detected UL42 by western blot analysis (Du et al., 2016; PMID: 26377421).

Antibody First Published in: Du et al. Characterization of monoclonal antibodies that recognize the amino- and carboxy-terminal epitopes of the pseudorabies virus UL42 protein Appl Microbiol Biotechnol. 2016 Jan;100(1):181-92. [PMID:26377421](#)

Note on publication: The original paper describes the generation of six monoclonal antibodies specific for UL42 protein of PRV.

Product Form

Size: 100 µg Purified antibody.

Purification: Protein A affinity purified

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration:

1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
