Anti-ROR1 [1G8] Standard Size Ab03865-10.0

Isotype and Format: Human IgG1, Kappa

Clone Number: 1G8

Alternative Name(s) of Target: NTRKR1; Inactive tyrosine-protein kinase transmembrane receptor ROR1; Neurotrophic tyrosine kinase, receptor-related 1

UniProt Accession Number of Target Protein: Q01973

Published Application(s): FC

Published Species Reactivity: Human

Immunogen: A human antibody library generated from the peripheral blood lymphocytes of human donors. This specific clone was isolated by panning the library against human ROR1 protein.

Specificity: This antibody binds the human ROR1. ROR1 is a type I membrane protein and belongs to the ROR subfamily of cell surface receptors. It is a pseudo kinase that lacks catalytic activity. Receptor tyrosine kinase ROR1 plays an essential role in embryogenesis and is overexpressed in many types of malignant tumors. Antibody-based immunotherapies targeting ROR1 have been developed and evaluated in preclinical and clinical studies with promising outcomes.

Application Notes: The original human IgG1 version of this antibody binds human ROR1 protein with a binding affinity of $K_d = 4.9$ nM. This antibody can be used for the detection of human ROR1 using flow cytometry (CN104817642).

Antibody First Published in: [PMID:](#)

Note on publication:

Product Form

Size: 100 µg Purified antibody.

Purification: Protein A affinity purified

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
