## Anti-DPGA anthrax [F24F2] Bulk Size Ab03885-21.0-BT

This antibody does not have a J-chain and therefore presents as a hexamer, rather than a pentamer.

Isotype and Format: Mouse IgM, Kappa

**Clone Number:** F24F2

Alternative Name(s) of Target: DPGA; capsular antigen; yDPGA; gamma DPGA; poly-gamma-d-glutamic

acid; poly-γ-d-glutamic acid; antiphagocytic polypeptide capsule

**UniProt Accession Number of Target Protein:** 

Published Application(s): ICC, ELISA, IHC

Published Species Reactivity: Bacillus anthracis

**Immunogen:** The original antibody was generated by immunizing BALB/c mice with B. licheniformis γDPGA

in combination with CD40 agonist antibody.

**Specificity:** This antibody specifically binds the poly- $\gamma$ -D-glutamic acid ( $\gamma$ DPGA) capsule of Bacillus anthracis. Bacillus anthracis is surrounded by an antiphagocytic polypeptide capsule composed of poly  $\gamma$ -d-glutamic acid ( $\gamma$ DPGA). The  $\gamma$ DPGA capsule shields the vegetative form of B. anthracis from agglutination by monoclonal antibodies to its cell wall polysaccharide.  $\gamma$ DPGA has been identified recently as a potential target for vaccine development. Bacillus anthracis is a spore-forming bacterium and a causative agent for Anthrax, which is a highly lethal infectious disease in human and poses a great threat as an emerging bioterror agent.

**Application Notes:** This antibody was used for development of a quantitative capture ELISA for PDGA (PMID: 18195035). A 50:50 mixture of PDGA antibodies F24F2 and F26G3 was used in the development of an antigen capture ELISA with a sensitivity of approximately 9 ng/ml of serum after a 1/40 dilution and 2.25 ng/ml for a 1:10 dilution (PMID: 19506008). The HRP or Alexa Fluor 555 labelled antibody was also used in the immunohistochemical staining of  $\gamma$ DPGA in mouse liver and spleen tissues after they were injected with 500, 100, or 20µg of  $\gamma$ DPGA and tissues were harvested on days 1, 2, 4, and 8 (PMID: 18195035). This antibody was also used in the cellular localization of  $\gamma$ DPGA in mouse liver (PMID: 18195035).

**Antibody First Published in:** Kozel et al. MAbs to Bacillus anthracis capsular antigen for immunoprotection in anthrax and detection of antigenemia. Proc Natl Acad Sci U S A. 2004 Apr 6; 101(14): 5042–5047. PMID:15051894

**Note on publication:** Describes the generation of two antibodies against B. anthracis  $\gamma$ DPGA and evaluates their capacity to provide protection in pulmonary mouse model of anthrax.

#### **Product Form**

**Size:** 500 μg Purified antibody in bulk size.

**Purification:** Affinity Purified using a recombinant lectin column

Supplied In: PBS only.

**Storage Recommendation:** Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommed this antibody be handled under sterile conditions. For longer

storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
