Anti-N protein [2D7] Standard Size Ab03891-1.1

Isotype and Format: Mouse IgG1, Kappa

Clone Number: 2D7

Alternative Name(s) of Target: MVNP; N; NP; rMeN; Nucleoprotein; Nucleocapsid protein; Protein N

UniProt Accession Number of Target Protein: Q89933

Published Application(s): WB, ELISA, IHC

Published Species Reactivity: Measles virus

Immunogen: The original antibody was generated by immunizing BALB/c mice with recombinant Measles virus N protein.

Specificity: This antibody recognizes a conformational epitope located between amino acids 419-525 in the rMeN.

Application Notes: This antibody can be used for detecting the presence of measles virus in a sample using and IgG/IgM ELISA. The binding of this antibody to measles virus could be inhibited by measles IgG-positive human serum in a competitive ELISA (WO2009124378). This antibody was used for the detecting of measles virus N protein from nuclear extracts and cell lysates using western blot (PMID: 21195346; 22383906). This antibody was also used in the immunohistochemical staining of osteoclasts (OCL) derived from marrow cells obtained from a normal individual, Paget's disease (PD) patient and MVNP mouse (PMID: 21195346).

Antibody First Published in: [PMID:](#)

Note on publication:

Product Form

Size: 100 µg Purified antibody.

Purification: Protein A affinity purified

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
