Anti-M protein, serotype 5 [24.1.2] Standard Size Ab03917-23.0

Isotype and Format: Rabbit IgG, Kappa

Clone Number: 24.1.2

Alternative Name(s) of Target: Myosin; Streptococcal M-protein; Actin; Tropomyosin; Troponin

UniProt Accession Number of Target Protein: P02977

Published Application(s): ELISA

Published Species Reactivity: Streptococcus pyogenes, Human

Immunogen: The original antibody was generated by immunizing BALB/c mice with streptococcal M type 5 membranes followed by a second, boosting dose of Lysin M5.

Specificity: This antibody reacts with α -helical molecules and is anti-nuclear (binds DNA). Specifically, it binds streptococcal M-protein (type 5), human myosin, actin, tropomyosin, and troponin.

Application Notes: This antibody binds myosin at a low relative avidity, as determined in a competitive ELISA (Mertens et al., 2000; PMID: 11282394).

Antibody First Published in: Cunningham et al. Human and murine antibodies cross-reactive with streptococcal M protein and myosin recognize the sequence GLN-LYS-SER-LYS-GLN in M protein J Immunol. 1989 Oct 15;143(8):2677-83 [PMID:2677144](#)

Note on publication: The original publication describes the use of overlapping synthetic peptides to map the myosin cross-reactive epitopes of streptococcal M protein recognized by antibodies from acute rheumatic fever and rheumatic heart disease sera.

Product Form

Size: 100 µg Purified antibody.

Purification: Protein A affinity purified

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
