Anti-M protein, serotype 5 [6.5.1/113.2.1] Bulk Size Ab03919-1.1-BT

Isotype and Format: Mouse IgG1, Kappa

Clone Number: 6.5.1/113.2.1

Alternative Name(s) of Target: Streptococcal M-protein; Actin; Keratin; DNA; Vimentin

UniProt Accession Number of Target Protein: P02977

Published Application(s): ELISA

Published Species Reactivity: Streptococcus pyogenes

Immunogen: The original antibody was generated by immunizing BALB/c mice with streptococcal M type 5 membranes followed by a second, boosting dose of Lysin M5.

Specificity: This antibody reacts with α -helical molecules and the carbohydrate N-acetyl-b-D-glucosamine (GlcNac). Specifically, it binds streptococcal M-protein, actin, keratin, DNA, and vimentin.

Application Notes: This antibody binds myosin at a low relative avidity, as determined in a competitive ELISA (Mertens et al., 2000; PMID: 11282394).

Antibody First Published in: Cunningham et al. Human and murine antibodies cross-reactive with streptococcal M protein and myosin recognize the sequence GLN-LYS-SER-LYS-GLN in M protein J Immunol. 1989 Oct 15;143(8):2677-83 [PMID:2677144](#)

Note on publication: The original publication describes the use of overlapping synthetic peptides to map the myosin cross-reactive epitopes of streptococcal M protein recognized by antibodies from acute rheumatic fever and rheumatic heart disease sera.

Product Form

Size: 1 mg Purified antibody in bulk size.

Purification: Protein A affinity purified

Supplied In: PBS only.

Storage Recommendation: Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
