Anti-Ferritin H [H107] Standard Size Ab03941-10.0

Isotype and Format: Human IgG1, Kappa

Clone Number: H107

Alternative Name(s) of Target: FTH1; FTHL6; Ferritin heavy chain; Ferritin H subunit

UniProt Accession Number of Target Protein: P02794

Published Application(s): IP, ELISA

Published Species Reactivity: Human

Immunogen: The original antibody was generated by immunizing BALB/c mice with human heart ferritin.

Specificity: This antibody binds the H subunit of human ferritin. This protein catalyzes the oxidation of ferrous iron(II) to ferric iron(III) and stores iron in a soluble, non-toxic, readily available form. Ferritin is important for iron homeostasis.

Application Notes: The binding characterization of this antibody for H subunit of ferritin was done using ELISA and immunoprecipitation (PMID: 3089283).

Antibody First Published in: Luzzago et al. Immunochemical characterization of human liver and heart ferritins with monoclonal antibodies. *Biochim Biophys Acta*. 1986 Jul 25;872(1-2):61-71. [PMID:3089283](#)

Note on publication: Describes the generation of 27 murine antibodies against human liver and heart ferritins.

Product Form

Size: 100 µg Purified antibody.

Purification: Protein A affinity purified

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
