## Anti-D-Dimer [2E7] Bulk Size Ab04003-23.0-BT

**Isotype and Format:** Rabbit IgG, Kappa

**Clone Number:** 2E7

**Alternative Name(s) of Target:** XDP; Fragment D-dimer; Fibrin degradation fragment; Fibrin degradation product; Fibrin

**UniProt Accession Number of Target Protein:** P02671

**Published Application(s):** ELISA

**Published Species Reactivity:** Human

**Immunogen:** The original antibody was generated by immunizing BALB/c mice with human D-dimer as an immunogen.

**Specificity:** This antibody binds fragment D chains of fibrinogen (Fragment D), also called D-dimer. D-dimer is a protein fragment (small piece) that's made when a blood clot dissolves in your body. At D-dimer test is done to determine if a person has any blood clotting disorder.

**Application Notes:** The initial binding characterization of this antibody to human D-dimer fragment was done using ELISA. DD-3A8 and DD-2E7 bind different epitope of the human D-dimer fragment and can be used as antibody pair for detection of blood coagulation, where DD-3A8 acts as a capture antibody and DD-2E7 is used as detection antibody. The sensitivity of the double sandwich ELISA was reported to be 0.25 µg/ml (CN111057149).

**Antibody First Published in:** [PMID:](#)

**Note on publication:**

### Product Form

**Size:** 1 mg Purified antibody in bulk size.

**Purification:** Protein A affinity purified

**Supplied In:** PBS only.

**Storage Recommendation:** Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer storage, aliquot and store at -20°C.

**Concentration:** 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
