Anti-VWFpp [JG7] Standard Size Ab04115-10.0

Isotype and Format: Human IgG1, Kappa

Clone Number: JG7

Alternative Name(s) of Target: von Willebrand factor propeptide

UniProt Accession Number of Target Protein:

Published Application(s): ELISA

Published Species Reactivity: Human

Immunogen: The original antibody was generated by selecting antibody fragments using phage display technology, where two phage display libraries were amplified and used to screen for binding to von Willebrand factor propeptide (VWFpp) displayed on yeast cells.

Specificity: This antibody is specific for VWF propeptide (VWFpp) and not to the yeast used for the expression of the propeptides.

Application Notes: This antibody's original format (scFv) was used in a sandwich ELISA to determine the VWF propeptide levels in plasma and showed a higher binding affinity for VWFpp in plasma at especially lower plasma concentrations (Meiring et al., 2018; PMID: 29992156).

Antibody First Published in: Meiring et al. The Use of Phage Display and Yeast Based Expression System for the Development of a Von Willebrand Factor Propeptide Assay: Development of a Von Willebrand Factor Propeptide Assay Biomed Res Int. 2018 May 24;2018:6232091. doi: 10.1155/2018/6232091 [PMID:29992156](#)

Note on publication: The original publication describes the development of a cost-effective assay for the diagnosis of von Willebrand disease, focusing on the detection of von Willebrand factor propeptide using phage display and yeast-based expression systems.

Product Form

Size: 100 µg Purified antibody.

Purification: Protein A affinity purified

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
