Anti-3-SLeX [E2-B4] Bulk Size Ab04158-1.29-BT

This is a Fab fragment with a his-tag.

Isotype and Format: Mouse Fab fragment, His-Tagged, Lambda

Clone Number: E2-B4

Alternative Name(s) of Target: B4; 3'Sulfo-Lewis X

UniProt Accession Number of Target Protein:

Published Application(s): IB, ELISA, IHC

Published Species Reactivity: Human

Immunogen:

Specificity: This antibody recognises the 3'sulfo-βGal linkage found on the tetrasaccharide carbohydrate Sialyl LewisX (sLeX), usually found attached to O-glycans on the surface of cells. 3'-Sulfo-Lewis X (3-SLeX) is a glycan epitope that has been reported to act as a ligand for the adhesion molecules E- and L-selectin. The synthesis of 3-SLeX is mediated by the enzyme galactose-3-O-sulfotransferase (GAL3ST2), which is expressed in cell lines with high metastatic potential.

Application Notes: The specificity of the original format of the antibody was confirmed by ELISA analysis. The original format of the antibody was used for staining of fresh frozen human colon cancer tissue, demonstrating it could bind to individual cells and to discrete stromal components. The original format of the antibody was employed for lipid immunoblotting of a total lipid extract of LS180 cells.

Antibody First Published in: [PMID:](#)

Note on publication:

Product Form

Size: 500 µg Purified antibody in bulk size.

Purification: Purified by Immobilized Metal Affinity Chromatography

Supplied In: PBS only.

Storage Recommendation: Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
