UniProt Accession Number of Target Protein:

Published Application(s): neutralize, SPR, Block, ELISA

Published Species Reactivity: Human

Immunogen: The original antibody was produced by immunizing HuMab® mice with human IL-17.

Specificity: This antibody is specific for human IL-17A and human IL-17F. It also binds their respective dimers — IL-17AA, IL-17AF, and IL-17FF.

Application Notes: This antibody successfully completed phase I clinical trials (Mitra et al., 2014; PMID: 25398489). The pharmacokinetics of this antibody and the post-dose levels of IL-17AA and IL-17FF in healthy were assessed as part of the phase I study (Peng et al., 2018; PMID: 30547287). The crystal structure of the Fab version of this antibody was resolved, and its binding kinetics (K_D) was measured at 7.78 ± 0.23 pM. Furthermore, alterations to the antibody's aromatic residues in its binding site and their effect on binding kinetics were assessed (Tilegenova et al., 2020; PMID: 31779513).
