Anti-VP1 protein [860-55D] Standard Size Ab04448-10.3

This antibody was created using our proprietary Fc Silent™ engineered Fc domain containing key point mutations that abrogate binding to Fc gamma receptors.

This is a reformatted human IgG1 Fc Silent Fc Silent™ antibody, based on the original human Fab format, created for improved compatibility with existing reagents, assays and techniques.

Isotype and Format: Human IgG1, Fc Silent™, Lambda

Clone Number: 860-55D

Alternative Name(s) of Target: HPV B19; VP1; VP2; Major capsid protein VP2; Viral protein 2; Human parvovirus B19

UniProt Accession Number of Target Protein: Q75U93

Published Application(s): IP, neutralization, ELISA, IF

Published Species Reactivity: Human parvovirus

Immunogen: The original antibody was raised from peripheral blood mononuclear cells from individuals previously infected with Human parvovirus B19.

Specificity: This antibody is specific for a conformational epitope in VP2.

Application Notes: The original antibody was used for an ELISA on the VP1 protein of Human parvovirus B19. This antibody was tested for its neutralization ability in a human erythroid-cell colony-forming assay. It showed it was able to neutralize the parvovirus (Gigler et al., 1999; PMID:9971777). The structure of the original antibody was determined using cryo-EM (Sun et al., 2019; PMID:30787153). This antibody was used for immunoprecipitation on B19 capsids (Ros et al., 2006; PMID:17020940, Bönsch et al., 2010; PMID:20826697). Further this antibody was used for an immunofluorescence infectivity assay, this confirmed the neutralizing of the antibody (Ros et al., 2006; PMID:17020940). This antibody was used for immunofluorescence on B19 infected UT7/Epo cells (Bönsch et al., 2010; PMID:20826697, Quattrocchi et al., 2012; PMID:22718826).

Antibody First Published in: Gigler et al. Generation of Neutralizing Human Monoclonal Antibodies against Parvovirus B19 Proteins J Virol. 1999 Mar; 73(3): 1974–1979. [PMID:9971777](#)

Note on publication: The original paper generated four cell lines secreting human immunoglobulin G monoclonal antibodies (MAbs) from two healthy donors and one human immunodeficiency virus type 1-seropositive individual with high serum titers against parvovirus.

Product Form

Size: 100 µg Purified antibody.

Purification: Protein A affinity purified

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
