## Anti-Genome polyprotein [1D5] Bulk Size Ab04460-1.29-BT

This is a Fab fragment with a his-tag.

**Isotype and Format:** Mouse Fab fragment, His-Tagged, Kappa

**Clone Number:** 1D5

**Alternative Name(s) of Target:** CA6; VP1; Capsid protein VP1

**UniProt Accession Number of Target Protein:** A0A0K2BNC7

**Published Application(s):** in vitro, in vivo, neutralization, ELISA, IHC

**Published Species Reactivity:** Coxsackievirus A6

**Immunogen:** The original antibody was raised by immunizing a mouse with Coxsackievirus A6.

**Specificity:** This antibody is specific for the immune-dominant antigenic site within VP1 comprising the BC, DE, EF, and HI loops of Coxsackievirus A6. It does not show the same reactivity in other Coxsackievirus variants.

**Application Notes:** The original antibody was used for immunohistochemistry on Coxsackievirus A6 infected mice. Further this antibody was used for an in vivo neutralization assay on BALB/c mice. The BALB/c mice were passively immunized with this antibody before being infected with Coxsackievirus A6. This significantly increased survival rates. This antibody was also used for a neutralization assay where the mouse was first infected with Coxsackievirus A6 before injecting this antibody. This also increased survival rates (Yang et al., 2016; PMID:27582066). This antibody was used for an in vitro neutralization assay, the binding of Coxsackievirus A6 to RD cells was tested and showed a decrease compared to the control. This antibody was used for an ELISA on Coxsackievirus A6 particles. The structure of this antibody was determined using Cryo-EM (Xu et al., 2017; PMID:28894095).

**Antibody First Published in:** Yang et al. A neonatal mouse model for the evaluation of antibodies and vaccines against coxsackievirus A6 *Antiviral Res.* 2016 Oct;134:50-57. [PMID:27582066](#)

**Note on publication:** The original paper established the first neonatal mouse model for the evaluation of antibodies and vaccines against Coxsackievirus A6.

### Product Form

**Size:** 500 µg Purified antibody in bulk size.

**Purification:** Purified by Immobilized Metal Affinity Chromatography

**Supplied In:** PBS only.

**Storage Recommendation:** Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer

storage, aliquot and store at -20°C.

**Concentration:** 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
