NUF2 FISH Probe

Catalog # : FA0052

規格 : [200 uL]

List All

Specification

Product Description:	Made to order FISH probes for identification of gene amplification using Fluorescent In Situ Hybridization Technique. (Technology)
Supplied Product:	DAPI Counterstain (1500 ng/mL) 250 uL
Storage Instruction:	Store at 4°C in the dark.
Origin:	Human
Source:	Genomic DNA
Notice:	We strongly recommend the customer to use FFPE FISH PreTreatment Kit 1 (Catalog #: KA2375 or KA2691) for the pretreatment of Formalin-Fixed Paraffin-Embedded (FFPE) tissue sections.
Regulation Status:	For research use only (RUO)

Gene Information

Entrez GeneID: [83540](#)

Gene Name: NUF2

Gene Alias: CDCA1,NUF2R

Gene Description: NUF2, NDC80 kinetochore complex component, homolog (S. cerevisiae)

Gene Ontology: [Hyperlink](#)

Gene Summary: This gene encodes a protein that is highly similar to yeast Nuf2, a component of a conserved protein complex associated with the centromere. Yeast Nuf2 disappears from the centromere during meiotic prophase when centromeres lose their connection to the spindle pole body, and plays a regulatory role in chromosome segregation. The encoded protein is found to be associated with centromeres of mitotic HeLa cells, which suggests that this protein is a functional homolog of yeast Nuf2. Alternatively spliced transcript variants that encode the same protein have been described. [provided by RefSeq]

Other Designations: NUF2, NDC80 kinetochore complex component, OTTHUMP00000032177, OTTHUMP00000032178, cell division cycle associated 1
