## SNW1 FISH Probe

Catalog # : FA0336

規格 : [ 200 uL ]

List All

### Specification

<b>Product Description:</b>	Made to order FISH probes for identification of gene amplification using Fluorescent In Situ Hybridization Technique. ( <a href="#">Technology</a> )
<b>Supplied Product:</b>	DAPI Counterstain (1500 ng/mL ) 250 uL
<b>Storage Instruction:</b>	Store at 4°C in the dark.
<b>Origin:</b>	Human
<b>Source:</b>	Genomic DNA
<b>Notice:</b>	We <b>strongly recommend</b> the customer to use FFPE FISH PreTreatment Kit 1 (Catalog #: <a href="#">KA2375</a> or <a href="#">KA2691</a> ) for the pretreatment of Formalin-Fixed Paraffin-Embedded (FFPE) tissue sections.
<b>Regulation Status:</b>	For research use only (RUO)

### Gene Information

**Entrez GeneID:** [22938](#)

**Gene Name:** SNW1

**Gene Alias:** Bx42,MGC119379,NCOA-62,PRPF45,Prp45,SKIIP,SKIP

**Gene Description:** SNW domain containing 1

**Omim ID:** [603055](#)

**Gene Ontology:** [Hyperlink](#)

**Gene Summary:** This gene, a member of the SNW gene family, encodes a coactivator that enhances transcription from some Pol II promoters. This coactivator can bind to the ligand-binding domain of the vitamin D receptor and to retinoid receptors to enhance vitamin D-, retinoic acid-, estrogen-, and glucocorticoid-mediated gene expression. It can also function as a splicing factor by interacting with poly(A)-binding protein 2 to directly control the expression of muscle-specific genes at the transcriptional level. Finally, the protein may be involved in oncogenesis since it interacts with a region of SKI oncoproteins that is required for transforming activity. [provided by RefSeq]

**Other** SKI interacting protein,SKI-interacting protein,homolog of Drosophila

**Designations:** BX42,nuclear protein SkiP,nuclear receptor coactivator, 62-kD
