ZFH3 FISH Probe

Catalog # : FA0373

規格 : [200 uL]

List All

Specification

| | |
|-----------------------------|---|
| Product Description: | Made to order FISH probes for identification of gene amplification using Fluorescent In Situ Hybridization Technique. (Technology) |
| Supplied Product: | DAPI Counterstain (1500 ng/mL) 250 uL |
| Storage Instruction: | Store at 4°C in the dark. |
| Origin: | Human |
| Source: | Genomic DNA |
| Notice: | We strongly recommend the customer to use FFPE FISH PreTreatment Kit 1 (Catalog #: KA2375 or KA2691) for the pretreatment of Formalin-Fixed Paraffin-Embedded (FFPE) tissue sections. |
| Regulation Status: | For research use only (RUO) |

Gene Information

Entrez GeneID: [463](#)

Gene Name: ZFH3

Gene Alias: ATBF1,ATBT

Gene Description: zinc finger homeobox 3

Omim ID: [104155](#), [176807](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: This gene encodes a transcription factor with multiple homeodomains and zinc finger motifs, and regulates myogenic and neuronal differentiation. The encoded protein suppresses expression of the alpha-fetoprotein gene by binding to an AT-rich enhancer motif. The protein has also been shown to negatively regulate c-Myb, and transactivate the cell cycle inhibitor cyclin-dependent kinase inhibitor 1A (also known as p21CIP1). This gene is reported to function as a tumor suppressor in several cancers, and sequence variants of this gene are also associated with atrial fibrillation. Multiple transcript variants expressed from alternate promoters and encoding different isoforms have been found for this gene. [provided by RefSeq]

Other AT motif-binding factor 1,AT-binding transcription factor
Designations: 1,OTTHUMP00000174934
