Gene Information

Entrez GeneID: [2887](#)

Gene Name: GRB10

Gene Alias: GRB-IR, Grb-10, IRBP, KIAA0207, MEG1, RSS

Gene Description: growth factor receptor-bound protein 10

Omim ID: [601523](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: The product of this gene belongs to a small family of adapter proteins that are known to interact with a number of receptor tyrosine kinases and signaling molecules. This gene encodes a growth factor receptor-binding protein that interacts with insulin receptors and insulin-like growth-factor receptors. Overexpression of some isoforms of the encoded protein inhibits tyrosine kinase activity and results in growth suppression. This gene is imprinted in a highly isoform- and tissue-specific manner. Alternatively spliced transcript variants encoding different isoforms have been identified. [provided by RefSeq]

Other Designations: GRB10 adaptor protein, insulin receptor-binding protein Grb-IR, maternally expressed gene 1
