Entrez GeneID: 10584

Gene Symbol: COLEC10

Gene Alias: CLL1, MGC118794, MGC118795

Gene Summary: This gene encodes a member of the C-lectin family, proteins that possess collagen-like sequences and carbohydrate recognition domains. The other members of this family are secreted proteins and bind to carbohydrate antigens on microorganisms

facilitating their recognition and removal. This gene product is a cytosolic protein, a characteristic that suggests that it may have different biological functions than other C-lectins. [provided by RefSeq]
