Datasheet

ASB7 (Human) Recombinant Protein (P01)

Catalog Number: H00140460-P01

Regulation Status: For research use only (RUO)

Product Description: Human ASB7 full-length ORF (NP_078984.2, 1 a.a. - 274 a.a.) recombinant protein with GST-tag at N-terminal.

Sequence:

MLHHHCRRNPQLQEELQIQAAVAAGDVHTVRKMLEQ

Host: Wheat Germ (in vitro)

Theoretical MW (kDa): 57.1

Applications: AP, Array, ELISA, WB-Re

(See our web site product page for detailed applications information)

Protocols: See our web site at

<http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Preparation Method: [in vitro wheat germ expression system](#)

Purification: Glutathione Sepharose 4 Fast Flow

Storage Buffer: 50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.

Storage Instruction: Store at -80°C. Aliquot to avoid repeated freezing and thawing.

Entrez GeneID: 140460

Gene Symbol: ASB7

Gene Alias: FLJ22551

Gene Summary: The protein encoded by this gene belongs to a family of ankyrin repeat proteins that, along with four other protein families, contains a C-terminal SOCS box motif. Growing evidence suggests that the SOCS box acts as a bridge between specific substrate-binding domains and the more generic proteins that comprise a large family of E3 ubiquitin protein ligases. In this way, SOCS box containing proteins may regulate protein turnover by targeting proteins for polyubiquitination and, therefore, for proteasome-mediated degradation. Two alternative transcripts encoding different isoforms have been described. [provided by RefSeq]
