Datasheet

GP9 monoclonal antibody, clone GR-P (PE)

Catalog Number: MAB13906

Regulatory Status: For research use only (RUO)

Product Description: Mouse monoclonal antibody raised against human GP9.

Clone Name: GR-P

Immunogen: Human red blood cells and platelets.

Host: Mouse

Theoretical MW (kDa): 17-22

Reactivity: Human

Applications: Flow Cyt

(See our web site product page for detailed applications information)

Protocols: See our web site at

<http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Form: Liquid

Conjugation: PE

Purification: Protein A/G purification

Purity: >90%

Isotype: IgG2a, kappa

Recommend Usage: Flow Cytometry (20 uL/10⁶ cells)

The optimal working dilution should be determined by the end user.

Storage Buffer: In PBS, pH 7.4 (protein stabilizer, 0.09% sodium azide).

Storage Instruction: Store in the dark at 4°C. Avoid prolonged exposure to light.

Entrez GeneID: 2815

Gene Symbol: GP9

Gene Alias: CD42a, GPIX

Gene Summary: This gene encodes a small membrane glycoprotein found on the surface of human platelets. It forms a 1-to-1 noncovalent complex with glycoprotein Ib, a platelet surface membrane glycoprotein complex that functions as a receptor for von Willebrand factor. The complete receptor complex includes noncovalent association of the alpha and beta subunits with the protein encoded by this gene and platelet glycoprotein V. Defects in this gene are a cause of Bernard-Soulier syndrome, also known as giant platelet disease. These patients have unusually large platelets and have a clinical bleeding tendency. [provided by RefSeq]
