## Datasheet

### **GYPA monoclonal antibody, clone HI264 (APC)**

**Catalog Number:** MAB15410

**Regulatory Status:** For research use only (RUO)

**Product Description:** Mouse monoclonal antibody raised against synthetic peptide of human GYPA.

**Clone Name:** HI264

**Immunogen:** A synthetic peptide corresponding to N-terminus of human GYPA.

**Host:** Mouse

**Theoretical MW (kDa):** 43

**Reactivity:** Human

**Applications:** Flow Cyt  
(See our web site product page for detailed applications information)

**Protocols:** See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

**Form:** Liquid

**Conjugation:** APC

**Purification:** Affinity purification

**Isotype:** IgG2a

**Recommend Usage:** Flow Cytometry (20  $\mu$ L/ $10^6$  cells)  
The optimal working dilution should be determined by the end user.

**Storage Buffer:** In PBS, pH 7.4 (protein stabilizer, 0.09% sodium azide).

**Storage Instruction:** Store in the dark at 4°C. Avoid prolonged exposure to light.

**Entrez GeneID:** 2993

**Gene Symbol:** GYPA

**Gene Alias:** CD235a, GPA, GPErik, GPSAT, GpMIII, HGpMIII, HGpMiV, HGpMiX, HGpMiXI, HGpSta(C), MN, MNS

**Gene Summary:** Glycophorins A (GYPA) and B (GYPB) are major sialoglycoproteins of the human erythrocyte membrane which bear the antigenic determinants for the MN and Ss blood groups. In addition to the M or N and S or s antigens that commonly occur in all populations, about 40 related variant phenotypes have been identified. These variants include all the variants of the Miltenberger complex and several isoforms of Sta, as well as Dantu, Sat, He, Mg, and deletion variants Ena, S-s-U- and Mk. Most of the variants are the result of gene recombinations between GYPA and GYPB. [provided by RefSeq]
